PROFESSIONAL SUMMARY

Licensed Systems Engineer building business software since 2018. Backend specialist in PHP/Laravel, also working with Java/Spring Boot, C#/.NET and Python/Django. Built 15+ business systems: ERPs with Peruvian (SUNAT) e-invoicing and platforms for healthcare, logistics, banking, retail and education, using REST APIs, job queues, automated tests and deployments on Linux VPS, Docker and AWS. Open to Backend or Full Stack roles (on-site, hybrid or remote).

TECHNICAL SKILLS

Backend	PHP, Laravel (Eloquent, Sanctum, Livewire, Filament, Horizon, Jobs/Queues, Scheduler), Java, Spring Boot, Spring Security, C#, ASP.NET, Blazor, Python, Django, FastAPI, Node.js, Express
APIs and architecture	REST APIs, OpenAPI, token authentication, OOP, design patterns, queues and background jobs, SUNAT e-invoicing (XML/CDR)
Databases	PostgreSQL, SQL Server, Oracle, MySQL, MariaDB, Redis; SQL query optimization, transactions and migrations
Frontend	JavaScript, TypeScript, Vue.js, Nuxt, Quasar, React, Next.js, Angular, Blade, Alpine.js, Tailwind CSS, Bootstrap
Mobile	React Native, Expo, Kotlin, Android, Flutter
Cloud and DevOps	Linux (Debian/Ubuntu), Nginx, Docker, WSL, AWS (EC2, RDS, S3), Azure VMs, Oracle Cloud (OCI), DigitalOcean, Cloudflare
Testing and tools	PHPUnit, Pest, JUnit, xUnit, pytest, Git, GitHub, GitLab (Merge Requests, code review); AI-assisted development: Claude Code, Codex, Cursor, GitHub Copilot

PROFESSIONAL EXPERIENCE

Datos Dezain Estudio E.I.R.L.

Jan 2019 – Jun 2026 · Lima, Peru

Full Stack Developer

- Built and maintained 15+ custom business systems (ERP, POS, ecommerce, healthcare, logistics, banking, education and construction), mainly with Laravel and PostgreSQL/SQL Server.
- Implemented SUNAT e-invoicing with XML generation, CDR storage in Amazon S3 and asynchronous processing through queues, Jobs and Scheduler (Redis/Horizon).
- Designed REST APIs with token authentication (Sanctum), OpenAPI documentation and automated tests with PHPUnit and Pest.
- Optimized SQL queries for large document volumes and used transactions and migrations to keep data consistent.
- Built interfaces with Vue.js, Nuxt, React, Livewire and Filament, and mobile apps with React Native and Kotlin consuming the APIs.
- Deployed and managed applications on Linux VPS with Nginx and Docker, and on AWS (EC2, RDS, S3).
- Worked with Git/GitLab (Merge Requests and code reviews) in sprints, gathering requirements and estimating tasks.

Vendo Fast

Jan 2018 – Dec 2018 · Lima, Peru

POS System Developer

- Designed the relational database and sales workflows of a POS system (PHP, MySQL, JavaScript, Bootstrap).
- Developed product, inventory, cash register and receipt modules, with daily sales reports and role-based user access.

SELECTED PROJECTS

Commercial Management ERP with E-Invoicing
Laravel · Vue.js · PostgreSQL · Redis/Horizon · Amazon S3

Sales, inventory, quotes and cash management with roles, permissions and PDF/Excel reports. SUNAT e-invoicing with XML and CDR stored in S3, processed through queues, Jobs and Scheduler.

Banking Document Management System
Laravel · Sanctum · REST APIs · SQL Server · Nginx

Registration and renewal of banking agent licenses. REST API with token authentication and SQL queries optimized for large document volumes.

Clinical Lab Results Portal
Laravel · React · REST APIs · SQL Server · Amazon S3

Online results for patients, doctors and companies with role-based access; PDF reports generated and stored for secure download.

SisColegio – School Management System
Laravel · REST APIs · OpenAPI · PostgreSQL · PHPUnit

Enrollment, payments and user permissions with SUNAT invoicing; API documented with OpenAPI and covered by automated tests.

Business Intranet
Java · Spring Boot · Spring Security · Angular · Oracle · JUnit

ERP-style intranet with invoicing, Spring Security and JUnit tests.

Attendance and Payroll with Face Recognition
Python · Django · PostgreSQL

Employee attendance tracking with face recognition and payroll management.

Multi-Company ERP for Medical Supplies
Laravel · Eloquent ORM · PostgreSQL · AWS RDS · Amazon EC2

Purchasing, stock and sales for several companies on a single platform; transactions and migrations to keep data and e-invoicing consistent.

Logistics Tracking Platform
Laravel · Vue.js · REST APIs · SQL Server · Linux

Real-time tracking of sea and air imports/exports, showing status, dates and documents for each shipment.

Medical Records and Appointments System
Laravel · Vue.js · MariaDB · REST APIs · OOP

Patients, medical records and appointment scheduling in one place, with facial authentication for patients and staff.

SICMO API and Warehouse Management API
Laravel · Eloquent ORM · PostgreSQL · Pest · GitLab

Backends for business management and per-warehouse inventory control, with roles, permissions, reports and Pest tests.

POS, Ecommerce and Biometrics
C# · ASP.NET · Blazor · SQL Server · SourceAFIS

Sales and ecommerce solutions with fingerprint recognition.

Mobile apps: MyERP Mobile and payment notifications
React Native · Expo · TypeScript · Kotlin · SQLite

ERP mobile app connected to its REST API, and an Android app that captures payment notifications (Yape) and sends them to the server.

More projects, screenshots and certificates at jspadev.com/nosotros and on LinkedIn.

EDUCATION AND PROFESSIONAL REGISTRATION

B.S. in Systems Engineering – Professional degree
Universidad César Vallejo (UCV) · 2019 – 2025

Licensed Engineer – Full Member (CIP No. 398379)
College of Engineers of Peru – Lima Chapter · 2026

Full Stack Web Development Program
Academlo · 2023

LANGUAGES

Spanish: native · English: intermediate (B1)

CERTIFICATIONS

- Spring Boot & Spring Framework from Zero to Expert – UNI (2022)
- Building REST APIs with Laravel and MySQL – Udemy (2020)
- PHP, C# MVC .NET, Kotlin, SQL Server, Oracle SQL, MySQL/MariaDB and Python – UNI (2023–2026)
- AWS Certified CloudOps Engineer (prep), Azure VMs and Oracle Cloud Infrastructure – Udemy (2025)
- AI Coding Agents: Claude Code, Codex, Cursor and Copilot – Udemy (2025)
- Vue.js 3, Django, Blazor, React Native, Flutter and Tailwind CSS – Udemy (2023–2024)
